# Class16 Extra Credit

# Eduardo Modolo

Downstream analysis of Kallisto Results

# BiocManager::install("tximport")

For example there is an R function called tximport() in the tximport package, which enables straightforward import of Kallisto results

```
library(tximport)

# setup the folder and filenames to read
folders <- dir(pattern="SRR21568*")
samples <- sub("_quant", "", folders)
files <- file.path( folders, "abundance.h5" )
names(files) <- samples

txi.kallisto <- tximport(files, type = "kallisto", txOut = TRUE)</pre>
```

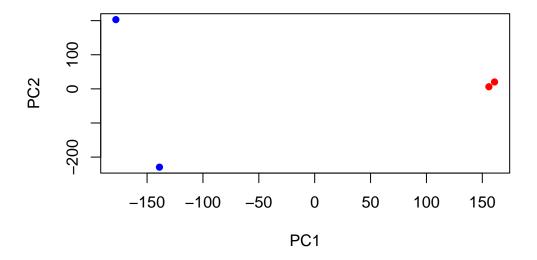

#### 1 2 3 4

needed to download hdf5 and rhdf5 from bioconductor

```
head(txi.kallisto$counts)
```
